

We Need to Stay  
at Home

Right now, we don't get to go to school.

I might feel sad, mad, or confused about this.

I miss my teachers and my friends.

Right now, all the teachers and kids need to stay at home.

All the doctors and helpers are telling us to stay at home.

The doctors and helpers say that there are germs called Corona Virus that can make people have a cough and fever.

The doctors and helpers say if we stay at home for a while, we can make sure everyone feels better and healthy.

# The doctors and helpers say we can all keep healthy by:

washing our hands for  
20 seconds

covering our mouth when  
we cough

covering our mouth when  
we sneeze

We are going to have a lot more home days.

# But at home, we can do a lot of fun things!

read books

play with toys

watch TV

color pictures

spend time with  
family

At home, we are going to listen, work hard, and ask for help when we need it.
